

YOUR TURN

Histogram practice exercise

Recreate this plot:

DATASET: **mpg**. (x=displ)

This plot is a histogram, and the labels on top of each bar are the count of how many items fall in each category.

For this plot, you'll need to apply what we've learnt in the GRAMMAR part (statistical transformations and **computed aesthetics**) and what we've learnt in the PLOTS part, in particular about histograms.
